## COMPANY OVERVIEW

# Driving Long-Term Growth While Servicing Various Sectors With Expertise

Emarat Aloula Group is a diversified business conglomerate that specialises in a wide range of services including the design, engineering, procurement, construction, utilities, power, water, renewables, and infrastructure. Our expertise also includes onshore green- and brownfield development, upgrades, and modifications in the oil and gas industry, along with facilities management solutions for industrial, commercial, healthcare, water and wastewater, and military sectors. We cover a wide range of fabrication services with a large piping fabrication capacity.

Initially a part of the Kharafi National Group since 1996, Emarat Aloula Group (EAG) was fully acquired by Ali and Sons Holding in 2021 and consists of two divisions, namely Emarat Aloula Contracting (EAC) and Emarat Aloula Industries (EAI) in addition to Al Maha Water.

## Our Philosophy

We prioritise our obligations with a strong sense of responsibility towards safety, health, and the environment for our clients and the community. At our core, we understand that achieving sustained great performance is essential to becoming a leading company, and we work hard to achieve it. We recognize the growth and development of our employees as the foundation for our company's future, and we are dedicated to providing them with the necessary resources and support to reach their full potential. Our profitability is a direct result of our performance, reflecting the high standards we set for ourselves and the services we provide.

## Our Vision and Mission

Our vision at Emarat Aloula Group is to be the leading regional provider of value-added services to our customers. We aim to increase our market share in various sectors such as petroleum, chemical, power, waste, wastewater, waste management, facilities management, and communications. To achieve this, it is our mission to maintain our status as the top commercial and industrial contracting company in the Middle East region.

## Our History

The Emarat Aloula Group has enjoyed much growth and progression over our many years in the industry. Discover our history and key milestones below.

## Our Divisions

Discover the breadth of our capabilities with our comprehensive range of divisions

## Emarat Aloula Contracting (EAC)

Emarat Aloula Contracting is a multi-disciplinary general contractor in the utilities and infrastructure in addition to oil and gas, and facilities management services provider in the Middle East. It was established in 1996 and formerly known as Kharafi National Co, before being acquired by Emirati Management in December 2017. The company offers investment, design, engineering, procurement, construction, commissioning, and facilities management services to industries such as Oil & Gas, Petrochemical, Power, Water, Wastewater, Commercial, and Industrial sectors.

With a project portfolio of AED 2.6 billion and a workforce of 2500, EAC has solid relationships with prominent international EPC firms and clients in the region. The company believes in strategic partnerships with technology providers across the globe to deliver value-added services to clients, with a focus on quality services, performance, availability, and efficiency of their plants.

## Emarat Aloula Industries (EAI)

Emarat Aloula Industries (EAI) is a specialised fabrication facility located in Zone III of the Industrial city of Abu Dhabi, United Arab Emirates. Since 2010, EAI has been fabricating a diverse range of products including piping, pressure vessels, heat exchangers, tanks, steel structures, modular skids, and evaporators for various sectors such as oil and gas, petrochemical, power, water, wastewater, and industrial infrastructure. EAI has also executed projects for large architectural structures in stadiums, shopping malls, and amusement parks. With state-of-the-art facilities and a proven track record in fabrication, EAI provides rigorous testing procedures, delivery, and installation services under the most challenging conditions. EAI's team guarantees high-quality, competitive products and consistent professional delivery to its clients.

## Al Maha Water Services LLC

Al Maha Water Services LLC is specialized in Operation and Maintenance of Wastewater Treatment Plants. It was established in 2008 as a Special Purpose Company to fully Operate and Maintain Al-Wathba and Al-Saad Wastewater Treatment Plants under a Build, Own, Operate and Transfer (BOOT) scheme, which shall continue until 2033.

The plants were designed in 2006 with special considerations for the public safety and environment preservation, utilizing latest technology for onsite power generation using the produced biogas, as well as on site Chlorite generation for effluent water disinfection.

The Company possesses high caliber expertise in this field, who are self-dependent in carrying out all the required work spectrum of the treatment process, maintenance of equipment and full quality control of the products and activities. For this reason, the plants are consistently producing effluent at a very high quality, meeting the stringent UAE and international standards.

## Services and Solutions

Emarat Aloula Contracting offers customised Infrastructure, construction, oil and gas, and facilities solutions to help clients achieve success. We are a reputable developer of Infrastructure projects, integrated contractors, and provider of facilities management services.

## Utilities and Infrastructure Development Projects (UIDP)

Utilities and Infrastructure Development Project (UIDP), EAC's development arm, offers comprehensive finance, design, construction, and operation/maintenance packages for large-scale projects in various sectors. As a leading operational investor and developer, UIDP caters to clients' needs in Water, Wastewater, Power, District Cooling, and Solid Waste Management.

## Oil and Gas (EPC)

EAC offers construction services for heavy industrial plants in Oil & Gas, Petrochemical, Power, Water, and related sectors through its two operating units, Mechanical, Electrical, and Instrumentation Unit, and Civil Unit. We also provide equipment and fabrication solutions, and support in material management, quality control, and health and safety, all while complying with the highest international safety and quality standards.

## Power and Transmission Projects

With a diverse range of experience in Construction of Electricity Utility including Power houses, Grid Substations, cable laying and termination, EAC has executed various Projects for prestigious clients such as Transco, Abu Dhabi Distribution Company (ADDC) and Dubai Electricity and Water Authority (DEWA).

## District Cooling Plants

EAC offers construction services for heavy industrial plants in Oil & Gas, Petrochemical, Power, Water, and related sectors through its two operating units, Mechanical, Electrical, and Instrumentation Unit, and Civil Unit. We also provide equipment and fabrication solutions, and support in material management, quality control, and health and safety, all while complying with the highest international safety and quality standards.

## Water and Waste Water EPC Projects:

EAG has been an integral player in the Water and Waste Water Construction business with land mark projects such as Saadiyat Island STP, Al Wathba Saad Water Treatment Plant, and Dubai Airport Storm Water System Upgrade, among other Longline of successful projects. EAG stands tall with successful achievements.

## Water and Waste Water Management

In EAG, we recognize the vital importance of sustainable water and waste water management in safeguarding the environment and preserving precious natural resources for future generations. It is not merely a requirement but an integral part of our vision for a sustainable future, accompanied with our commitment to implement eco-friendly practices in every aspect of our operations. We ensure that our projects are environmentally sustainable and legally compliant.

Our responsible and innovative practices set us apart as a leading company to build, manage, operate and maintain water and wastewater systems in UAE.

EAG is fully managing the main treatment plants in Abu Dhabi with a total capacity exceeding 500,000 m<sup>3</sup>/day of waste water, and managing portable Reverse Osmosis units of different sizes to produce high standard effluent that meet or exceed regulatory standards.

In addition, EAG manages a major sector of Abu Dhabi's storm water network, which includes monitoring the network to prevent illegal discharges of polluted waters to the environment.

Through cutting-edge technologies and proven water and waste water management strategies, we strive to reduce the carbon footprint and maximize water reuse opportunities while ensuring compliance with all regulations to build a greener and more sustainable environment.

## Facilities Management

Our Facilities Management division provides 24x7 expert services to clients, focusing on cost-effective solutions, lasting relationships, and reducing our carbon footprint through innovation and forward-thinking strategies. We offer tailor made-made solutions for commercial, residential, retail, academic, government, healthcare, and military facilities through our Facilities Management Institutional and Commercial (FM I&C) Operations and provide a comprehensive end-to-end solution through our Total Facilities Management offering.

## Emarat Aloula Industries (EAI) Products

**Emarat Aloula Industries (EAI)** "Previously known as ABJ Industries" is a fabrication facility located at Zone III of Industrial City of Abu Dhabi, United Arab Emirates. We are in operation since 2010.

EAI is specialized in design and manufacturing of pressure vessels, heat exchangers, pressure piping, pressure tanks, atmospheric tanks, steel structures, modular skids and evaporators for oil and gas, petrochemical, power, water, wastewater and industrial infrastructure sectors.

EAI executed projects of design and manufacturing of large architectural structures for stadiums, shopping malls and amusement parks.

EAI is a fully functional fabrication and manufacturing facility. In addition to this, we are able to subject our products to the most rigorous testing procedures and to arrange delivery and installation under the most testing of conditions.

Supported by EAI's impressive track record in fabrication and its wide-ranging product portfolio and through the use of brand-new highly-advanced facilities, the professional teams in EAI guarantee their clients consistent, high-quality products at very competitive prices.

## Support Services

### Equipment

At EAG, we believe that the right project equipment can be the difference between mediocrity and excellence. As a leading provider of cutting-edge project solutions, we take pride of having comprehensive range of state-of-the-art equipment tailored to meet unique project requirements. Our commitment to innovation and quality ensures that projects are executed efficiently, safely and with a competitive edge. With our top-of-the line equipment, we stand in achieving outstanding project success.

### Scaffolding

EAG take pride in our commitment to safety, quality, and efficiency, ensuring that construction projects reach new heights with the support of our expert team and reliable scaffolding systems.

We have a proven track record in delivering innovative scaffolding solutions in a creative, cost-effective manner while remaining focused on our top priority - SAFETY. Our commitment to safety has led us to gain qualifications that enable us to work in such safety-critical environments.

### Calibration Center

As part of our assurance to deliver quality services, EAG houses a modern calibration department that constantly assures all our equipment and tools are both certified and calibrated.

A photograph of two industrial workers in a factory. The worker on the right is in the foreground, wearing a white hard hat, clear safety glasses, and a blue work shirt. He has a beard and is looking towards the left, appearing to be in conversation. The worker on the left is partially visible, also wearing a white hard hat and safety glasses. The background shows industrial machinery and a bright light source, possibly a window or a lamp, creating a warm, golden glow. A blue horizontal bar is overlaid on the image, containing the text 'About Emarat Aloula Industries (EAI) Products'.

## About Emarat Aloula Industries (EAI) Products

## Piping Spool Fabrication

We have a state-of-the-art facility equipped with advanced machineries such as CNC cutters, welding machines, and hydraulic presses to produce large volume piping spool fabrication up to 1 Million Inch Dia per Year.

## Structural Steel and Fabrication

As a prominent company in the Middle East, we specialise in designing steel structures for heavy industries, including Oil & Gas. Additionally, we have experience constructing various types of facilities such as stadiums, malls, and amusement parks.

## Pressure Vessels

EAI is capable of designing, manufacturing, and supplying various pressure vessels, reactors, columns/towers, desalter vessels, and filter vessels, in compliance with ASME Sec VIII Div 1 and ASME Sec VIII Div 2. We have the accreditation to repair the existing pressure vessels as per NBIC "R" stamps.

## Process Equipment and Skids

Our pressure vessels are integral to the operations of refineries in the desalination, oil and gas, petrochemical, and power plant industries. Our skids are used for constructing complex structures in limited spaces, such as offshore oil rigs, industrial complexes, and commercial installations.

## Corrosion Protection Services

We have the essential expertise to apply external and internal coatings and linings on pressure vessels, tanks, and process piping to prevent corrosion and prolong the lifespan.

## Shop Fabricated Pressurised Storage Vessels

We have the ability to design, manufacture, and supply pressurised storage and atmospheric storage tanks for various industries including Oil & Gas, Petrochemical, Fertiliser, Water, Waste Water, Chemical, and allied industries.

# Certifications

EAI meets the highest global safety and quality standards, with our ISO-certified quality management system and American Society of Mechanical Engineers (ASME) accredited fabrication facility. Our staff is highly qualified and our computerised management systems ensure compliance with quality standards. We are also accredited to apply the NB "R" stamp for product alterations.

# Accreditations

At Emarat Aloula, the protection of health, safety, and the environment is of utmost importance. Over the years, we have developed HSE standards that are comparable to international benchmarks. These exemplary safety standards are continuously being modified and strictly enforced in our operations in Abu Dhabi.

# Certifications

## His Excellency Ali bin Khalfan Al Mutawa Al Dhaheri

Founder/ Chairman of Ali & Sons Group

The world we live in is constantly changing. The industries and technologies around us are evolving at breakneck speed, giving companies new demands to meet, challenges to overcome, and ever-higher expectations to meet and exceed. At Ali & Sons, we see this as an opportunity.

Shamis bin Ali Al Dhaheri is the Vice Chairman and Group Managing Director. With 20 years of experience in business, Shamis has learned that the right teams guided by the right leaders can create miracles.

Shamis graduated from University College London with a Master's Degree in Civil Engineering and has received a Certificate of Achievement from the late H.H. Sheikh Rashid bin Saeed Al Maktoum for his services to the UAE. He worked as an engineer before joining Ali & Sons' industrial sector.

## Shamis Ali Al Dhaheri

Vice Chairman & Group Managing Director  
of Ali & Sons Holding

OUR CLIENTS

## Growing the Success of Prestigious Companies

Since its inception, the Emarat Aloula Group has been privileged to work with a number of leading companies in the Oil & Gas, Power, Water, and Wastewater, Petrochemical, and other related sectors.

We have established our client list to include high-profile clients like the Ministry of Foreign Affairs, Al Dar, Transco, ASMEF, ADPC, EMAAR, and Tabreed. Our level of quality, safety, and service excellence has allowed us to secure 90% of existing long-term contracts with clients.

## Occupational Health and Safety Policy

The Emarat Aloula Group is committed to complying with the Occupational Health and Safety Management's requirements that help to enhance our efficiency, effectiveness, and health and safety standards. At all stages of our processes, we adopt only the highest health and safety standards, whether that be when working with plants, machinery, or the materials we utilise. Personal protective equipment (PPE) is issued to every employee in line with international health and safety standards while meeting the requirements of the project at hand. Furthermore, our management teams ensure full safety is upheld through engineering measures, ongoing safety inspections, and detailed safety audits.

# Environmental, Social, and Governance (ESG) at Emarat Aloula

As a growing leader in the world of investment and business, the Emarat Aloula Group is putting together a strategy that will help us grow to become one of the top-rated ESG companies.

A company's Environmental, Social, and Governance Rating is based on the following pillars:

## ESG

## The Ali & Sons Group of Companies

Ali & Sons Holding LLC started in 1979 in Abu Dhabi. Owing to its progress, it soon evolved into a diversified conglomerate and has recently become Ali & Sons Holding LLC. Under the dynamic leadership of H.E. Ali bin Khalfan Al Mutawa Al Dhaheri - The Founder and Chairman of The Family Council - Ali & Sons diversified its activities and operations by establishing new businesses within several sectors of the local economy.

Ali & Sons has strong presence in the Automotive, Oil & Gas, Contracting, Commercial, Marine Engineering, Retail, Property Management, Manufacturing and Information Technology Industries. Ali & Sons is associated with some of the most prestigious brands in the world, such as Porsche, Volkswagen, Audi, Skoda and Morris Garage (MG). The Group's own brands have a significant market share, building purely on the Group's strength and quality of its products and services. These brands are Amwaj Jewellery, Ali & Sons Real Estate and Eurostar Rent A Car to name a few.

## Energy & Industrial Group

For over four decades, Ali & Sons has been a prominent service provider catering to clients in the Oil & Gas, Petrochemical, and related Energy and Industrial fields. Our Energy & Industrial division is made up of various departments that cooperate to offer comprehensive contracting and building solutions, as well as services in Oil & Gas, utilities and infrastructure, facilities management, and marine engineering.
